Enhancing Infrastructure in Cottonwood Heights

Councilmember Suzanne Hyland

The statements in this article are the author's views and not necessarily of the entire city council.

Every time I fly home to Utah, I look at the Wasatch mountains from an airplane window and think how lucky I am to live in this amazing place.

Majestic mountains with city conveniences entice other people to vacation right here, where I am fortunate enough to live. We highly value our quality of life in this beautiful mountain suburb. Many factors contribute to quality of life, including infrastructure, which is hardly noticed until the orange cones emerge in the Spring.

There are several welcome infrastructure improvement projects in the city that will be well worth the occasional orange cone and inconveniences to bring enhanced access

to high-speed internet, ensure safe drinking water, and to replace worn out roads. All projects are within the city, but only road replacement is being managed by the city.

High-speed filber internet

SenaWave is building its own core network infrastructure in Cottonwood Heights and is now connecting homes and businesses to its Fiber. SenaWave CEO David Bradshaw said, "We are excited to bring our Fiber-Optic Internet to Cottonwood Heights. We look forward to the relationships and sense of community we can be part of in Cottonwood Heights as we help connect residents to the fastest Fiber Internet in town."

Before SenaWave does work in a neighborhood, you will receive a flyer on your door. In most scenarios their fiber construction will follow the current path of power (e.g. underground or overhead on power poles). This work normally consists of placing conduit in the Public Utility Easement for underground OR in overhead applications

placing fiber on power poles.

Residents who sign up for service will get a fiber line connected to their home from the main line infrastructure. If you have questions about construction or your specific home or are interested in signing up for service, call their main number, 801-217-9000, or go to their website, www.senawsve.com/cottonwoodheights, for more information.

Safe drinking water

Water treatment plants are located at the mouths of Big and Little Cottonwood Canyons. The Big Cottonwood Water Treatment Plant (BCWTP) cannot be upgraded and must be completely reconstructed. This necessitates laying a new pipeline with the capacity to send sufficient water to the Little Cottonwood Water Treatment Plant for treatment. The pipeline will run parallel to the existing Salt Lake Aqueduct to ensure uninterrupted water supply during reconstruction. The project was carefully planned to ensure significant water conservation. The city extends gratitude to the many neighbors who will endure construction on their property easements for all to have safe drinking water.

Construction will begin this Spring. The pipeline

starts at the mouth of Big Cottonwood Canyon, goes west on Ft. Union, veers south at Nutree Drive through Mountain View Memorial Estates, and proceeds south through various neighborhoods until it reaches BCWTP. Metropolitan Water District of Salt Lake & Sandy directs the project, not the city. Metro Water created a dedicated website with a pipeline map, timeline, and how to contact them with questions or concerns at www. cottonwoodsconnection.com.

Road reconstruction

Many of our suburban roads are worn out from age or frequent use. In our relatively small city, there are approximately 130 centerlines miles of roads that require monitoring and maintenance. Roads are assessed using a standard Pavement Condition Index and then prioritized for maintenance and reconstruction. Through careful and thoughtful planning, public works has done some form of maintenance on every mile in the last five years except for severely damaged areas that require reconstruction. Spreading roadwork over many years prevents big draws on city funds and allocates taxpayer dollars most effectively and efficiently.

Two reconstruction projects are top priority this year: the Town Drive Area Roadway and Prospector Drive Area. Road, curb, and gutter in these areas will be torn out and rebuilt. Construction is estimated to begin in May and be completed by September. Disruptions will be managed through frequent communication with residents. Please be patient, as there may be road closures and detours.

To view these projects or to see the five-year plan for local road maintenance and reconstruction, visit the city's website, cottonwoodheights.utah.gov. Click on City Services, then Public Works, then Streets. On this page, there is a link, "Local Roads FY 23-28 Pavement Plan," that shows a map of the city and when repairs are projected to be done. Public works can be reached at 801-944-7002 with questions.

Please contact the appropriate organization if you have questions about these infrastructure projects.

Maintenance and improvements to infrastructure are a core function of the city government. The mayor, council, and staff are committed to maintaining and improving the infrastructure and quality of life in Cottonwood Heights.

History question of the month

Who were the very first settlers to camp out between Big and Little Cottonwood Canyons in an area formerly known as Butlerville, but not known as Cottonwood Heights?

Elder Fraud-The Green Dot Scam

Police Chief Robby Russo

Elder fraud with prepaid debit cards is a major issue that targets both vulnerable seniors and even techsavvy adults in our city.

Recently, one man who is an avid fisherman thought his unpaid fishing license led to a warrant and was

convinced to buy green dot cards out of embarrassment. Scammers often trick older folks into purchasing loaded debit cards, claiming to be law enforcement, or seeking payment for debts/services, taking advantage of their financial naivety. With the advancement of artificial intelligence (AI), scammers can even mimic the voices of loved ones in need of help.

Because green dot cards are reloadable and easily accessible, scammers use them to obtain money discreetly. It's important to educate elderly relatives about green dot scams and monitor their finances to prevent fraud. I was in a local store and pleasantly surprised as a woman was buying green dot cards and was questioned by a cashier, showing vigilance against scams. I had a personal experience while off duty when I withdrew cash from my bank and the manager interceded. I was initially taken back, thinking he was overstepping in a private transaction, but financial institutions also train staff to intervene to protect customers from fraud. It probably doesn't help that I'm aging and probably look like a good "mark"

A terrifying case in Cottonwood Heights involved a woman nearly conned into giving thousands of dollars. When she told the scammers she didn't drive anymore, they sent a car to take her to the mall. A vigilant security guard intervened, preventing a potential disaster. We found the vehicle, which was a rental obtained with a bogus identification. Just imagine the potential scenarios that could have played out the instant she got into that car!

If in doubt, call our dispatch office and establish a family code word for safety, AI can't anticipate a response, it's the same advice we always gave our children when they encountered an adult claiming they were there to help. Remember, law enforcement and the IRS never ask for payments over the phone. Stay safe as we enter tax season, as these scams may increase.

To enhance the safety of older members of the community, the police department will be conducting free educational seminars at City Hall, 2277 East Bengal Blvd. Specially trained officers will be hosting these sessions, which will include light refreshments.

The seminars will take place in the Community Room on Saturday, May 18, 2024, at 10 am and Thursday, June 20, 2024, at 6 pm. The class will last approximately an hour, and officers will be available for networking and questions afterward. Attendees are encouraged to bring family members, and no RSVP is necessary.

Eight guidelines to follow to help prevent flooding in the city this spring

Prepare for potential flooding this spring and summer with the following information from Cottonwood Heights and Salt Lake County Emergency Management:

- Call police dispatch at 801-743-7000 to report flooded rivers and streams
- Call Salt Lake County Flood Control to report debris in a river, creek, stream or canal, and visit their website (slco.org/flood-control) for more resources
- Remove debris in the streambed before stream levels rise if you own property adjacent to it. Once you remove the debris, pile it on the street in front

- of your home and call the public works team at 801-944-7000 to remove it.
- Do not enter the creeks once the water level is high, and watch children and pets who could fall in
- Monitor water sources for potential flooding during rain and heavy runoff
- Turn around if a street is flooded instead of driving through it
- Check stormwater inlet grates in front of your home and remove any debris that collects there. Call 801-944-7000 or fill out the form at ch.utah.gov/

public-works to report a blocked inlet.

Visit the city flood prevention page

floods) and city social media pages, and subscribe to emails at **ch.utah.gov/emails** for more details.

Top Eight Reasons to Leash Your Dog

Tom Middaugh and Barb Harmer, Captains with the Volunteers in the Parks

- 1. Off-leashed dogs can spread viruses and bacteria that are harmful to humans and the environment. Dog waste may contain Salmonella, E. Coli, Staph, Giardia, roundworms, tapeworms, heartworms, and Parvo virus.
- 2. When a dog's waste is not cleaned up, it can contaminate water, infect other dogs, the environment, and humans. Waste must be cleaned up and properly disposed of. According to the Cottonwood Heights Municipal Code 8.24.015 A 8, it is mandatory.
- 3. Children are at face height with many dogs. Off-leashed dogs often jump up and lick. This can be terrifying for children and may even push them to the ground.
- 4. Children move in unpredictable ways, often suddenly. Off-leashed dogs will see this as a threat or a call to play. This is how children get bitten.
- 5. Loose dogs chase each other and approach people. They jump, run through legs, and bump into people. This is a fall risk, especially for the young, elderly, and disabled.
- 6. Loose dogs will go after food. If you are eating and an off-leashed dog approaches, you don't know what the dog will do.
- You have the right to enjoy your visit to the park with your leashed dog without the fear of being attacked by an off-leashed dog. This is the number one concern of leashed dog owners.
- 8. It's the law. The intent of the leash law is to protect the health and safety of you, others, your pet, and the park. According to the Cottonwood Heights Municipal Code 8.24.090 D and Salt Lake County Municipal Code 13.04.100, it is mandatory to leash your dog.

Please note that this applies to all parks except for Ferguson Dog Park.

Stormwater Tip of the Month

May the fourth be with you as you work towards keeping our creeks and waterways clean. You can start by sweeping up dirt and debris from your sidewalks and gutters. Remember not to hose down debris into the storm drain, as it can contaminate our waterways.

Seasonal Container Reservation Program

Wasatch Front Waste & Recycling District

The Seasonal Container Reservation Program is officially underway! Set your reminders! Reservations are on a first-come, first-served basis due to limited staffing. Reservations are open online for containers on the dates below:

- Zone 1 Reservations Open: May 13th Containers Available: May 31- June 07.
- Zone 2 Reservations Open: May 20th Containers Available: June 10 - 14.
- Zone 3 Reservations Open: May 17th Containers Available: June 17 -24.

Containers will be dropped off sometime Between 7:00 a.m. and 5:00 p.m. on the scheduled day. Wasatch Front Waste & Recycling District staff will try to ensure that residents have up to 24 hours with the container. Driveways must be cleared, accessible, and enough room (approximately 10' x 20') for the container to be placed off the street and public sidewalk. If the driveway is inaccessible, he container will not be delivered, and you will lose your opportunity for the container at your residence. Please visit our website to see what is and isn't allowed in the containers. Can't

find your zone on the map? Head to the "Do We Service You?" tab on our website. Search for your

Zone 1

Zone 2

June 10 - 14

June 17 - 24

June 17 - 24

address and your SCRP dates will be listed.

District Diversion

The District's diversion rate for the first quarter of 2024 (January-March) was **19%**, which exceeds our goal of 18%!

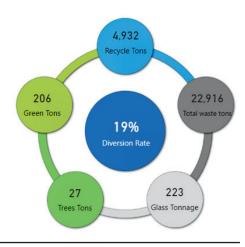

The District's diversion rate is the percentage of residential municipal waste diverted from the landfill through reuse, reduction, recycling, and composting programs.

The Landfills serving the Wasatch Front are filling up!

The Trans-Jordan Landfill is predicted to reach capacity in less than 8-10 years, while the Salt Lake Valley Landfill is set to reach capacity in about 40 years. After these landfills fill up, trash will need to be transported out of the valley, increasing vehicles on the road, emissions and transportation costs.

Diverting from the landfill supports the longevity of these landfills and reduces our carbon footprint. WFWRD offers multiple diversion opportunities including recycling, glass recycling, and subscription weekly curbside green waste collection.

Check our website and follow us on social media to find out how you can help divert waste from the landfill: www.wasatchfrontwaste.org.

Discovering the rich history and amenities of Mountview Park

Ronna Cohen, member of Parks, Trails, and Open Space Committee Gail Gonger, member of the Historic Committee

"Time to go," said a mom at the Mountview Park playground, 1651 East Fort Union Blvd. "I don't want to!" a sentiment expressed by many because the Park boasts amenities for all: two playgrounds, splash pad, tennis and basketball courts, soccer fields, restrooms, pavilions, and walking paths with a connection to the East Jordan Canal Trail.

Mountview serves as the venue for many beloved

events, including Bark in the Park, Bites in the Heights, and various community sporting events.

A team of Volunteers are "eyes on" in the Park, looking for graffiti, overflowing trash, broken water pipes or playground e q u i p m e n t . Interested when visiting Mountview or any other Cottonwood Heights park? trash,

Andrew Davis at andrew@cottonwoodheights.com.

On the southside hill, Chris Owens, Vice Chair of the Parks, Trails, and Open Space Committee has led the effort to create a walkable experience through an active pollinator garden with educational signage. Chris said, "Planting of perennials will be in phases. Pollinators need our help."

In 1875, John Watts Berrett, a Latter-day Saint

convert from England, received a 160-acre homestead grant on this property. Known as Berrett Land, his five sons built homes here. They grew watermelons to sell to passersby.

On the west side of the park is the East Jordan Canal Trail. In the 1870s, the canal

was originally built to transport granite for the Salt Lake Temple; railroads were used instead. Salt Lake City purchased the canal in the early 1900s as part of a water exchange with irrigation companies taking water from Big Cottonwood Creek. Salt Lake then diverted the water from Big Cottonwood Canyon into Salt Lake City.

Answer

Question, continued from page 2

8:30 p.m. o n Friday, Aug. 20, 1847, five men were sent by Brigham Young to explore the Twin Peaks, located in the south-east area of the Great Salt Lake Valley. Albert Carrington (age 34), John Brown (age 27), William Rust (age 40), George Wilson (age 40) and Alva Calkins (age 22) started on horseback from the Great Salt Lake City settlement to ride by moonlight to the western base of Twin Peaks, now known as the top of the World subdivision, where they camped for the night.

The following morning, on Saturday, Aug. 21, the four men

began their ascent up the mountain to record various data. John Brown left an excellent account of his climb in his autobiography:

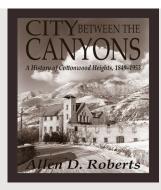

"Four of us commenced to ascend the mountain at 8 a.m., leaving a guard (Calkins) with our horses. This was the 21st day of August. After toiling about eight hours and being very much fatigued, three of us reached the summit of the west peak. One man gave out and lay down by a snow bank. We had a barometer, thermometer and a compass. We took some observations by which we learned that the peak was 11,219 feet above the sea; temperature

55 above zero at 5 p.m. The same day at noon it was 101 in the valley."

After spending the majority of the day up on the mountain, they began their descent but were interrupted by darkness, forcing them to spend their Saturday night on the mountain. At first light on Sunday morning, the continued down to the base camp, gathered belongings and returned to report to Brigham Young. It was written they were "satisfied with our first attempt at climbing mountains." (Source: "The Lady in the Ore Bucket" by Charles L. Keller, pp. 16-17.) ■

Get a Jump on High School this Summer with Canyons Virtual Academy

Looking to get a jump on high school and graduate early or catch up on missed credits? Enroll now in Canyons Virtual Academy's online summer courses. As a certified Statewide Online Education Programs, Canyons Virtual Academy (CVA) is approved to serve high school students from all across Utah. The courses are completely free of charge. What's more, the learning is self-paced and competency-based, which means students can complete the coursework while traveling with family or hanging out at the pool. "Summer is a popular time to take advantage of CVA. We have

students who want to get credits out of the way to free up space in their fall schedule. Others sign up to retake a class for a better grade," said CVA Principal Amy Boettger.

CVA offers several electives and most core classes, including honors courses, physical education, and financial literacy. Students can sign up now for the summer session, which runs from May 31 and Aug. 31, 2024. Scan QR Code for information.

Public Works Building Ribbon Cutting and Open House

Come and celebrate with us on Monday, May 13th, 2024! The ribbon cutting will take place from 5:30 p.m. to 6:00 p.m., followed by a public open house from 6:00 p.m. to 7:00 p.m.

Sustainability

WaterWise Landscaping Incentives for Cottonwood Heights Residents

Ian Harris, Associate Planner/Sustainability Analyst

Spring is in full swing! This time of the year, most Cottonwood Heights residents and property owners are likely brainstorming ways to landscape their properties for the year, while simultaneously cutting down on their water usage and impact to the environment.

At City Hall, we often get calls asking if the city provides any incentives or subsidizing for WaterWise landscaping. While the city doesn't, our water utilities do, through the Utah Water Savers program. Residents can take advantage of some great landscape incentives, including:

- Turf Replacement up to \$3.00/square foot
- Switch to Drip Watering \$1.00/square foot
- Treebate \$50/tree
- New Construction Landscaping \$1.00/square foot

In addition to these WaterWise l a n d s c a p i n g incentives, Utah Water Savers also offers rebates for Smart Controller purchase and

installation (up to \$75) and **Toilet Replacement** (up to \$100).

If you're interested in saving money on your landscaping this year, or if you're simply curious, please visit **utahwatersavers.com**. Each individual incentive has eligibility rules, so **please be sure to review them before undertaking any work!**

In addition, you can find assistance and advice on designing, implementing, and maintaining water-efficient landscaping at **localscapes.com**.

Business spotlight

Parker Moon, LLC | www.parkermoon.com | julia@parkermoon.com

Get ready to pamper your skin with Parker Moon, LLC – an organic skincare venture straight out of Cottonwood Heights, brought to you by local beauty guru, Julia Walton. Their lineup is all about quality. They use top-tier organic ingredients

without the top allergens; all products are gluten-free, dairy-free, nut-free, and free of synthetic fragrances (but they still smell like a dream!). Dive into the goodness at parkermoon.com and treat your skin to some serious TLC!
